

How It Works

The "NewBody NewMe" app streamlines the process for new patients to get started with our services.

From the mobile app, patients can

1. Fill out a new patient intake form
2. Schedule a Zoom consultation
3. Receive medication deliveries,
4. Request medication refill by filling out a progress report form

How to Administer GLP-1 Injections

1. **Prepare:** Ensure the medication is stored as recommended by the pharmacy, and areas are cleaned with alcohol wipes.
2. **Inject:** Pinch the skin, insert the needle at a 90-degree angle, and press the plunger.
3. **Discard:** Dispose of used needles in a sharps container.
